**ABOUT THIS REFERENCE GUIDE**

The information in this Reference Guide forms part of the Product Disclosure Statement (PDS) issued by Evolution Trustees Limited (Evolution, the Responsible Entity, we or us) as Responsible Entity of the Acorn Capital Micro Opportunities Fund (ARSN 673 344 833) (Fund) and dated 26 June 2026. Acorn Capital Limited (Acorn Capital or the Investment Manager) is the Investment Manager of the Fund.

Defined terms used in the PDS have the same meaning in this Reference Guide unless stated otherwise.

We recommend that you keep a copy of the PDS for the Fund and this Reference Guide for future reference.

The information contained in the PDS and this Reference Guide is general information only and has been prepared without taking into account your personal objectives, financial situation or needs. You should read this Reference Guide together with the PDS (in their entirety) before making a decision to invest in the Fund. You should consult a licensed financial adviser to obtain financial advice that is tailored to suit your personal circumstances before proceeding to acquire or dispose of units in the Fund.

You can access the PDS, Target Market Determination (TMD) and this Reference Guide from [www.acorncapital.com.au](http://www.acorncapital.com.au). You can obtain, free of charge, a paper copy of the PDS and this Reference Guide upon request by emailing Acorn Capital at [info@acorncapital.com.au](mailto:info@acorncapital.com.au)

## How the Acorn Capital Micro Opportunities Fund works

### INVESTING AND WITHDRAWING

#### Initial applications

You may invest in the Fund by using the application form accompanying the PDS. The PDS and application form are available at [www.acorncapital.com.au](http://www.acorncapital.com.au).

We can only process your application if:

- we consider that you have correctly completed the application form;
- you have provided us with the relevant identification documents, if required; and
- we have received the application money (in cleared funds) stated in your Application Form. The time it takes for application money to clear varies depending on how you transfer the money and your bank.

We reserve the right to accept or reject applications in whole or in part at our discretion and delay processing of applications where we believe this to be in the best interest of all the Fund's investors, without giving any reason, or where incomplete documentation has not been provided.

We reserve the right at our discretion to accept application or redemption amounts below any applicable minimum amounts.

To invest in the Fund, use the application form accompanying the PDS or via the online application process at [www.acorncapital.com.au](http://www.acorncapital.com.au).

#### Additional investments

Additional investments can be made at any time in writing using the appropriate form and will generally be processed on the business day they are received (if received by the Unit Registry by 2pm Melbourne time).

#### Distributions

Any distributions reinvested are reinvested at the ex-distribution net asset value (NAV) per unit price. The ex-distribution NAV per unit price is calculated by taking the value of the investments of the Fund and taking away the value of the liabilities as defined in the Fund's constitution including the provision for distribution. We make no adjustment for costs of buying or realising investments (called a buy/sell spread). We divide the result of this by the number of units we have on issue. These steps give us a per unit price used in connection with reinvestment of distributions.

#### Withdrawing

Units in the Fund are not listed on any stock exchange like the ASX, so you cannot sell your units through a stockbroker.

If you want to withdraw your money, submit a withdrawal form to the Unit Registry. Instructions on how to submit a withdrawal form are contained on the form itself.

If you request a withdrawal of units using electronic means, including the online process, you will need to accept full responsibility (to the extent permitted by law) for losses arising from us acting upon electronic means, faxed or scanned instructions which comply with these security processes and you also agree to release and indemnify us and our agents (including the Unit Registry) in respect of any liabilities arising from us acting on electronic, faxed or scanned instructions (including future instructions), even if those instructions are not genuine. You also agree that neither you nor any other person has any claim against us in relation to a payment made or action taken under the electronic, facsimile or scanned instruction service if the payment is made in accordance with these conditions. These terms and conditions are additional to any other requirements for giving withdrawal instructions.

The amount of money you receive is determined by the unit price we calculate at the time we process your withdrawal request. We can withhold from amounts we pay you, any amount you owe us or we owe someone else relating to you (for example, the Australian Taxation Office).

We generally pay withdrawal proceeds in cash to your nominated bank account, however we are permitted under the constitution of the Fund to pay proceeds in kind (i.e. in specie).

# A

## How the Acorn Capital Micro Opportunities Fund works (continued)

### Payments can be delayed

In certain circumstances we may need to delay withdrawal of your money. We can delay withdrawal of your money for up to 120 days in accordance with the Fund's constitution, including if:

- there are not enough investments which we can easily turn into cash (the law dictates this). We do not expect the Fund to become illiquid. If the Fund is illiquid you do not have a right to withdraw from the Fund. In such circumstances you can only withdraw where we make a withdrawal offer in accordance with the Corporations Act. We are not obliged to make such offers;
- something outside our control affects our ability to properly or fairly calculate the unit price (for example, if the investments are subject to restrictions or if there is material market uncertainty). We can delay payment for so long as this goes on;
- we receive a quantity of withdrawal requests representing more than 10% of the value of the investments of the Fund. We can stagger withdrawal payments;
- an emergency or similar state of affairs occurs which, in our reasonable opinion, makes it impractical to redeem units or which might be prejudicial to the remaining investors;
- there is a closure or material restriction on trading on the ASX or realisation of the assets cannot be effected at prices which would be obtained if assets were realised in an orderly fashion over a reasonable period in a stable market; or
- we otherwise consider it is in the best interests of the investors to delay withdrawal of units.

### Compulsory redemption

In certain circumstances we can, or may be required to, redeem some or all of your units compulsorily, including:

- if your account falls below the minimum investment amount;
- if you breach your obligations to us (for example, you provide misleading information in your application form);
- to satisfy any amount of money due to us (as responsible entity or in any other capacity relevant to the Fund) by you;
- to satisfy any amount of money we (as responsible entity or in any other capacity relevant to the Fund) owe someone else relating to you (for example, to the Australian Taxation Office);
- where we suspect that law prohibits you from legally being an investor; or
- such other circumstance as we determine in our absolute discretion (but we must always act in the best interests of investors as a whole when deciding to do this).

### How we calculate unit prices

We calculate unit prices in the following way:

1. we calculate the value of the investments of the Fund and take away the value of the liabilities as defined in the Fund's constitution;
2. we make an adjustment (up for the entry price, to take account of the costs of buying investments or down for the exit price to take account of the costs of realising investments – by applying a buy/sell spread). The buy/sell spreads do not represent a fee payable to us or the Investment Manager and are discussed in more detail in "Additional explanation of fees and costs" in the PDS; and
3. we divide the result of this by the number of units we have on issue to produce a unit price.

Please note, all forms related to the administration of your investment in the Fund are available from the following website: [www.acorncapital.com.au](http://www.acorncapital.com.au). This includes application forms, additional investment forms, and withdrawal forms. Each form contains details as to how to send the form to the Fund's Unit Registry.

## Benefits of investing in the Acorn Capital Micro Opportunities Fund

### BENEFITS AND FEATURES

#### Experience

Managed funds pool investor money in one place, and the professionals who manage the Fund use their resources, experience and expertise to make investment decisions.

Acorn Capital believes emerging Australian companies provide investors with the ability to access attractive financial returns and portfolio diversification, whilst delivering a positive economic benefit to the broader Australian economy.

The investment approach utilised at Acorn Capital seeks to identify the best emerging companies within an industry. These companies are the next generation of Australian corporate successes, typically associated with high levels of productivity and innovation, as well as providing new employment opportunities for Australians.

Acorn Capital distinguishes itself through its large research and investment team, with expertise across the majority of industries and the provision of expansion capital to developing companies. Together they are committed to investing for better outcomes.

Paul Palumbo is primarily responsible for managing the assets of the Fund on a day to day basis.

#### Paul Palumbo (Director and Portfolio Manager)

Paul Palumbo is a Portfolio Manager and Head of Portfolio Implementation with responsibility for the Healthcare, Industrial and Consumer sectors, undertaking fundamental research of companies within those sectors and selecting stocks for inclusion in client portfolios. Paul joined Acorn Capital in 2007. Paul began his career at PwC and IBM Business Consulting. Paul holds a bachelor of Business Information Systems and a Graduate Diploma in Applied Finance and Investment.

#### Corporate governance

Under the Corporations Act and the Fund documents, investors are provided with several layers of independent oversight providing a robust corporate governance structure. The structure provides additional investor safeguards through the separation of duties, specialisation of expertise, clear lines of responsibility and layered approval processes.

Evolution is the responsible entity and we operate and administer the Fund through third party service providers as detailed below. We hold an appropriate AFSL.

We have appointed Acorn Capital as the investment manager of the Fund.

We have appointed The Bank of New York Mellon as the independent custodian to hold the assets of the Fund and SS&C Fund Services (Asia) Pte Ltd to provide administration services for the Fund.

We have appointed Boardroom Pty Limited to provide registry services for the Fund.

#### Clear legal rights

The constitution establishes the Fund and sets out the rules. Together with the PDS and the law from time to time, it governs your relationship with us and sets out your (and our) legal rights.

It gives us rights to be paid fees and expenses and be indemnified from the Fund. It governs (amongst other things) our powers (which are very broad), investor meetings and unit issue, pricing and withdrawal, as well as what happens if the Fund terminates.

The constitution limits our need to compensate you if things go wrong. Generally, subject always to liability which the Corporations Act imposes, we are not liable in equity, contract, tort or otherwise to investors for any loss suffered in any way relating to the Fund.

The constitution also contains a provision that it alone is the source of the relationship between you and us and not any other laws (except, of course, those laws that cannot be excluded).

We must have investor approval to make changes to the constitution that are adverse to the rights of investors.

You can obtain a free copy of the Fund's constitution by calling us on +61 2 8866 5150 or by accessing our website at [www.acorncapital.com.au](http://www.acorncapital.com.au)

## Risks of managed investment schemes

### RISKS IN GENERAL

#### About risk and return

All investments are subject to varying risks and the value of your investment can decrease as well as increase (i.e. you can experience investment gains or investment losses).

Investment returns are affected by many factors including market volatility, interest rates and economic cycles. Changes in value can be significant and they can happen quickly.

Different types of investments perform differently at different times and have different risk characteristics and volatility.

These are some of the reasons why you should consider investing in several different types of investments (often called diversification).

The significant risks associated with investing in this Fund are discussed in the PDS.

We cannot eliminate all risks and cannot promise that the ways they are managed will always be successful. However, the Investment Manager's process is an important step in managing many of these risks.

The performance of the Fund will be influenced by many factors, some of which are outside our control and the Investment Manager's control.

If these risks materialise, your distributions may be lower than expected or there may be none. The value of your investment could fall and you could lose money.

#### Ways to manage your risk

You can help manage your own risks too. You can:

- know your investment goals and your risk tolerance;
- understand risk and return and be comfortable that an investment may not give you the outcomes you hope for;
- diversify your investments (that is, do not invest all your monies in the Fund);
- invest for at least the recommended timeframe;
- keep track of your investment; and
- speak with a financial adviser and make sure the Fund is the right investment for you.

#### Additional Risks (in addition to section 4 of the PDS)

**Emerging companies risk:** The Fund has exposure to companies generally considered very small to small in terms of market capitalisation. Companies within this sector of the market may include recently established entities with limited public information, or entities engaged in new-to-market concepts which may be speculative in nature. Shares in companies in this sector are generally less liquid and more volatile than those of larger companies. Emerging companies exposure may result in higher unit price volatility and an increased risk of loss.

**Security specific risk:** Securities and the companies that issue them are exposed to a range of factors that affect their individual performance. These factors may cause an investment's return to differ from that of the broader market. The Fund may therefore underperform the market and/or its peers due to its security specific exposures.

**Defensive strategies risk:** The Fund may be protected against market downturns by employing defensive investment strategies. Such strategies have the aim of reducing the Fund's market exposure, and may include allocating a portion of the Fund's assets to cash. There is no guarantee that such defensive strategies will provide the expected levels of protection against loss. Additionally, there is a risk that defensive strategies are employed at a time when the market rises, potentially resulting in the Fund underperforming its peers or the benchmark.

**Unlisted securities risk:** The Fund may have exposure to securities which are not listed on a securities exchange. Unlisted securities may have a higher risk of loss, and may be difficult to independently value and to sell due to their unlisted nature. Where such securities do list (for example through an initial public offering, or IPO), the listing price may differ materially from the price previously used when calculating the Fund's unit price. Where the Fund has exposure to unlisted securities these may increase its unit price volatility, its potential to underperform its benchmark, and its potential for loss.

**Default risk:** Issuers or entities that the Fund has exposure to may default on their obligations, for instance by failing to make a payment due on a security or by failing to return principal. Such parties can include the issuers of securities that the Fund holds or has exposure to including warrants, depositary receipts, and hybrid securities. Counterparties to the Fund may default on a contractual commitment to the Fund. Counterparties may include over-the-counter derivatives counterparties, brokers (including clearing brokers of exchange traded instruments), stock lending counterparties, foreign exchange counterparties, as well as the Fund's custodian. Default on the part of an issuer or counterparty could result in a financial loss to the Fund.

**Currency risk:** The Fund may have exposure to investments denominated in currencies other than Australian dollars. Currency risk is the risk that fluctuations in exchange rates between the Australian dollar and foreign currencies impact the value of the foreign investments that the Fund has exposure to.

**International investments risk:** The Fund has exposure to international investments. Global and country specific macroeconomic factors may impact the Fund's international investments. Governments may intervene in markets, industries and companies; may alter tax and legal regimes; and may act to prevent or limit the repatriation of foreign capital. Such interventions may impact the Fund's international investments.

**Significant Investor Visa compliance:** While Acorn Capital has taken reasonable steps to ensure that the Fund is a complying 'emerging company investment' for the purposes of Migration (IMMI 15/100: Complying Investments) Instrument 2015, Acorn Capital does not warrant or guarantee that a successful application for investment in the Fund will lead to an investor obtaining a Significant Investor Visa (SIV). Acorn Capital does not accept liability for any loss or damage arising from you relying on an investment in the Fund as providing you with or entitling you to a SIV. The Fund may cease to comply with prevailing SIV requirements set by the Australian Government. There could be changes to, or in the interpretation or administration of, the SIV requirements, including but not limited to the types of investments that are complying investments for SIV purposes.

# D

## How we invest your money

### THE INVESTMENT PROCESS

Acorn Capital's investment philosophy is based on the belief that rigorous research in inefficient markets leads to superior returns. Inefficiencies typically result in information gaps that manifest themselves in the pricing of emerging companies. These inefficiencies typically result from information gaps due to what we consider to be a lack of research amongst emerging companies.

Experience and specialist skills are required to successfully invest in emerging companies. Reasoned judgement of both qualitative and quantitative factors are equally important when investing in early stage companies.

#### Approach

Acorn Capital's expertise is understanding how to research, analyse and invest in emerging companies and to construct diversified portfolios with appropriate risk/return properties.

Acorn Capital has provided institutional investors with risk managed microcap equity portfolios since 1999. It has one of the largest and most experienced dedicated microcap investment teams in Australia and has remained committed to researching all industry sectors of the emerging companies' universe.

Through Acorn Capital's research capability, the Fund's strategy exploits information inefficiencies through bottom-up research across the entire universe of ASX listed companies with a market capitalisation less than \$500 million at the time of investment. At any given time, the Fund will target a holding of between 50 and 70 stocks and up to 20% of the Fund's assets in cash.

The Fund may also invest in unlisted Australian companies, which will be limited to 10% of the net assets of the Fund. The Fund may hold up to 30% of its assets in companies with a market capitalisation of greater than \$500m. This strategy applies Acorn Capital's long-term focused investment philosophy.

Once identified a portfolio will be constructed of those investment opportunities that demonstrate appropriate risk/return profiles given their stage of development. Application of prudent portfolio risk management will be applied to ensure the portfolio is appropriately structured to meet the objectives of the Fund.

### The investment process

Stock selection occurs following a process of initial research, detailed research and ranking which are the responsibility of the sector specialist. The process of stock selection and portfolio construction is detailed below.

The sector specialist's initial or desk research involves understanding the company's stage of development and a high-level assessment of the investment opportunity relative to similar staged companies in the portfolio.

Detailed research is conducted on companies that move beyond the initial research stage. Analysis includes (but is not limited to) evaluation of sustainable, competitive advantage (inclusive of ESG factors), industry position, capital requirements, management, financial metrics and valuations.

The sector specialist will attempt to identify, select and recommend the most attractive investment opportunities through a consistent ranking process. Investment opportunities may be ranked across value, growth, quantitative risk, management and quality dimensions. Specific factors and weightings used to measure each dimension are determined by the sector specialists. The ranking process aims to provide a consistent view of the investment opportunity set, highlighting strengths and weaknesses of each opportunity. Investments recommended by the sector specialist will typically exhibit the most attractive risk/return characteristics relative to stage of development.

Portfolio Construction seeks to construct a portfolio of attractive investment ideas sourced from the entire investment universe diversified by stage of development, stock numbers and industry exposure. Shorter term trading opportunities may be added to the portfolio if appropriate to provide additional returns to the Fund.

# E

## Fees and costs

### ADDITIONAL EXPLANATION OF FEES AND COSTS

#### Can fees be different for different investors?

The law allows us to negotiate fees with “wholesale” investors or otherwise in accordance with ASIC requirements. The size of the investment and other relevant factors may be taken into account. The terms of these arrangements are at our discretion.

If you qualify as a wholesale investor, contact us to see if you’re eligible to negotiate fees with us.

#### What are the costs of investing and withdrawing from the Fund?

We have a documented policy (Unit Pricing Policy) in relation to the guidelines and relevant factors taken into account when calculating unit prices, including all transaction costs and the buy-sell spread. We call this our Unit Pricing Policy. We keep records of any decisions which are outside the scope of the policy, or inconsistent with it. A copy of the Unit Pricing Policy and records is available free on request. The Unit Pricing Policy is on our website ([www.evolutiontrustees.com.au](http://www.evolutiontrustees.com.au)).

#### Can the fees change?

We may change the fees for the Fund. Reasons for this might include changing economic conditions and changes in regulation. The constitution for the Fund sets the maximum amount we can charge for all fees. If we wished to raise fees above the amounts allowed for in the Fund’s constitution, we would need the approval of investors.

We will give you (or your IDPS operator) 30 days’ written notice of any proposed change to these fees.

We may accept lower fees than those disclosed in the fee table in section 6 of the PDS.

#### Government charges and taxation

Government taxes such as Goods and Services Tax (GST) will be applied to your account as appropriate. In addition to the fees and costs described in this section, standard government fees, duties and bank charges may also apply such as stamp duties. Some of these charges may include additional GST and will apply to your investments and withdrawals as appropriate.

The fees outlined in the PDS take into account any reduced input tax credits which may be available.

# F

## How managed investment schemes are taxed

### PAYING TAX

Australia has specific laws dealing with the taxation of certain trusts known as “Attribution Managed Investment Trusts” (AMITs). A trust can be an AMIT where it is a managed investment trust, its investors have “clearly defined interests” and the Responsible Entity makes an irrevocable election to enter the AMIT regime.

Consequences of entering the AMIT regime include:

- the “attribution” of income to investors whereby investors are taxable on the income of the Fund attributed to them by the Trustee in accordance with the Fund documents;
- the ability to carry forward under/over distributions of income;
- upward and downward adjustments to the tax cost base of units in the Fund; and
- deemed fixed trust treatment under the tax law.
- The Fund has elected to be an AMIT. Accordingly, taxable income flows through to investors on an attribution basis rather than a distribution basis:
- you will therefore be taxed on any income or capital gains attributed to you, regardless of the amount actually distributed to you. Your attributable income may comprise: income (for example, dividends and interest);
- net taxable capital gains (from the sale of the Fund’s investments); and
- tax offsets (for example, franking credits attached to dividend income and offsets for tax paid on foreign income).

Your tax liability ultimately depends on your circumstances, including whether you are an Australian resident. Additionally, you might be entitled to claim tax credits or concessions to reduce your tax liability.

We will distribute income and capital gains, if any, after 30 June each year.

It is important that you seek professional advice before you invest or deal with your investment. We will send you the information you need each year to help you to complete your tax return.

Additionally, Australian residents are generally subject to Capital Gains Tax (CGT) on gains when they sell or withdraw any money or transfer units.

Depending on the kind of taxpayer you are, and how long you have held your units, you may be entitled to a CGT concession which can reduce your CGT tax liability by up to one half.

If you choose not to provide us with your Tax File Number (TFN), Australian Business Number (ABN) or Australian Company Number (ACN) and don’t have an exemption, we must deduct tax at the highest personal rate, plus the Medicare levy, before passing on any distribution to you. The law is very strict on how we can use these details.

# G

## More information

### PRIVACY

We use personal information about you to administer your investment and also to conduct research.

By applying for units in the Fund you consent and agree to information about you being obtained and used by us. We will collect and use your information in accordance with our Privacy Policy, a copy of which is available free of charge.

If you fail to provide us with the required information or if you provide us with incomplete or inaccurate information we may not be able to provide you with the products or services you are seeking within the time periods contemplated in the PDS.

Personal information about you is used to administer your investment in the Fund and also to conduct research.

Your information will not be disclosed unless:

- the law requires;
- your financial adviser needs the information;
- it is in keeping with our Privacy Policy and may be provided to external service providers including the Fund's custodian, Investment Manager, auditors, taxation and legal advisers and information technology consultants; or
- we need it to send you promotional material. If you do not want this, indicate on the application form or contact us anytime.

We may provide your personal information confidentially to external service providers including the Fund's custodian, auditors, taxation and legal advisers and information technology consultants.

We will disclose information if required by law to do so (including under the Anti-Money Laundering and Counter-Terrorism Financing Act (AML/CTF Act) and relevant taxation legislation (including Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standards (CRS))).

If you fail to provide the required information or if you provide incomplete or inaccurate information we may not be able to provide you with the products or services you are seeking.

If you think any of the details that we hold are wrong or out of date, please contact us and we will correct the details. You can always access the personal information held about you by contacting us on +61 2 8866 5150.

### ANTI-MONEY LAUNDERING

In order to meet our obligations under the AML CTF Act or taxation legislation (including FATCA and CRS), we may require further information from you as to identity, the source of your funds and similar matters, known as Know Your Client (KYC) documentation.

We are required to verify that information by sighting appropriate documentation.

We may also ask an existing investor to provide KYC documents as part of the re-identification process to comply with the AML/CTF laws.

Processing of applications, redemptions or transfers may be delayed or refused if you do not provide the requested KYC documentation.

Under the AML/CTF laws, we may be required to submit reports to the Australian Transaction Reports and Analysis Centre (AUSTRAC), which may include the disclosure of your personal information.

We may not be obligated to inform you if this occurs and AUSTRAC may require us to deny you (on a temporary or permanent basis) access to your investment.

This may result in losses to your investments or you may experience significant delays.

We are not liable for any loss you may suffer because of compliance with the AML/CTF laws.

Records of the information obtained will be kept and may be required by law to be disclosed. Otherwise the information will be kept confidential.

By applying for units in the Fund, you also agree that we may, in our absolute discretion:

- determine not to issue units to you;
- cancel units which have been issued to you; and/or
- redeem any units issued to you.

If we believe such action to be necessary or desirable in light of our obligations under the AML/CTF Act or other legislation (including FATCA and CRS), we will not be liable to you for any resulting loss.
