### Acorn Capital - Investment Update

"In April, the portfolio rose by 2.7%, although the S&P/ASX Small Ordinaries Index rose by 3.3%, resulting in relative underperformance of 0.6%. A rebound in global risk sentiment, led by robust US tech earnings and surging hyperscaler capex, supported a recovery in Australian small caps after March's sharp selloff. However, an unresolved Middle East conflict kept oil elevated, while sticky inflation and further RBA tightening tempered the breadth of the rally. Within the portfolio, Materials – ex Resources (+20.9%), Materials - Resources (+11.0%) and Industrials - Capital Goods (+4.7%) were the strongest performing sectors. In contrast, Health Care (-8.3%), Energy (-3.2%), and Information Technology (-2.4%) detracted from performance during the month".

<sup>5</sup> As at 31 March 2026 <sup>6</sup> Calculated by Acorn Capital using full market capitalisation. S&P/ASX Small Ordinaries Index reports use float-adjusted market capitalisation, which may result in lower figures <sup>7</sup> Number of stocks, developing companies defined as those with revenues <10 of their market cap <sup>8</sup> the total portfolio weight of listed stocks (excludes unlisted investments and cash) included in the index.

**ACQ Objective**

The Objective is to create a diversified portfolio of listed microcap companies and then to invest opportunistically in unlisted entities that offer better relative value. The performance objective for ACQ is to outperform the S&P/ASX Small Ordinaries Accumulation Index over the medium to long term.

**Dividend Intention**

Acorn Capital Investment Fund Limited intends to pay annual dividends targeting at least 5% of closing post-tax NTA for each financial year, franked to the highest extent possible and without the Company incurring a liability.

Where the Company accumulates franking credits that the Board determines are in excess to its requirements it is the intent to distribute those excess credits by way of special dividends. This is subject to the Company having sufficient profit and cash flow to make such payments.

**Investment Philosophy**

The investment philosophy is based on a belief that there are pricing inefficiencies amongst emerging or microcap companies due to a lack of readily available external research conducted on such entities.

Acorn Capital believes that through a research driven investment process the pricing inefficiencies that exist in both listed microcaps and unlisted microcaps can be exploited to earn returns superior to those available in the broader market.

Unlisted microcap opportunities must be of better relative value on a risk-adjusted basis to displace existing listed portfolio investments in the corresponding sector.

**Investment Strategy**

- Research-driven stock selection
- Economic sector diversified
- Style agnostic
- Long term investor
- Create diversified portfolios to reduce volatility

**Investment Manager profile**

Acorn Capital was established in 1998 as a specialist investment manager in emerging Australian companies.

Acorn Capital distinguishes itself through its relatively large research and investment team with expertise across all industries as well as its provision of expansion capital to developing companies.

Through its strategies Acorn Capital can provide Investors with efficient off-index exposure to both public and private emerging companies.
